

WE'VE SPENT YEARS THINKING ABOUT HOSTING SO YOU WON'T HAVE TO.

At Connectria, we live to host.

We know infrastructure technology cold, and excel in complex multi-vendor environments. Embracing security as our hallmark, we protect customer data as if it were our own. Delivering proven results that allow you to focus on your business, rather than on your infrastructure. It's what we know. It's what we do.

EAT.

SLEEP.

HOST.

IT'S WHAT WE KNOW. IT'S WHAT WE DO.

CHOOSE A BUSINESS PARTNER, NOT A VENDOR.

In 1998, we opened our doors with just one customer. That customer simply happened to be Deutsche Bank, the world's largest bank. Our second client, IBM, followed quickly. And, today, over 1,000 companies worldwide see us as an extension of their IT department.

That's because, at Connectria, we won't just sell you space in a rack. We host one of the industry's widest range of technologies for Cloud, Managed, and Custom hosting solutions. And our entire approach is designed to meet your needs - not ours. So our salespeople have no sales quotas. And our solutions can be either packaged or highly customized.

You can choose from a broad array of OS, virtualization, database, email/collaboration and applications/web server technologies. But if you don't see the technology you're looking for, contact us and we'll craft a solution for you.

**Blackberry Enterprise Server • Citrix • HP-UX • Linux/LAMP (Open Source and RedHat)
IBM (Power Systems (AIX, IBM i, AS/400), DB2, Lotus Notes/Domino, WebSphere)
Microsoft (ASP.NET, Exchange/Outlook, SharePoint, SQL Server, SQL Server Cluster, Windows)
MySQL (Open Source) • Oracle (10g/11g, RAC, WebLogic) • Sun Solaris • VMware**

In the end, our ultimate business goal is to help you reach yours.

LET US HELP YOU CHOOSE THE RIGHT HOSTING PLAN:

CONNECTRIA'S HOSTING PLANS

CLOUD HOSTING

Run any software. Choose Any Hardware. Select from Cloud Computing (public or shared resources) and Private Cloud Computing (dedicated resources) across a variety of hardware, storage, software and managed services.

MANAGED HOSTING

Choose from a range of packaged managed hosting plans. Best for a limited number of vendors and technologies such as Windows, Linux or Citrix.

CUSTOM HOSTING

Choose when you need a hosting plan designed to your specs. Best for multi-vendor, complex technologies or custom environments (such as IBM, HP, Oracle and Sun).
