

# CONNECTRIA CITRIX CLOUD SERVICES

Fully Managed, High Availability Enterprise-Class Clouds

Starting as low as **\$70** per user/month

Rapidly deploy enterprise-class clouds and remotely run Windows applications within hours

Connectria Citrix Cloud Services is a highly available, pre-built Citrix XenApp environment that allows customers to quickly launch Citrix XenApp environments starting at just \$70/user per month. With Connectria's Citrix Cloud Services, you can rapidly deploy enterprise-class Clouds and remotely run Windows applications within hours.

Connectria Citrix Cloud Services is designed for organizations who want to start small and launch quickly, at an affordable price point.

Starting as low as \$70/user per month, businesses can enjoy a robust, fully managed cloud with high availability and security. Run your mission critical applications in the cloud and access them using any device, anytime, anywhere.

Connectria Citrix Cloud Services is ideal for:

- Companies with a small amount of desktop Office users
- Organizations seeking a robust, low-cost cloud for proof-of-concept
- Development projects in need of a high availability beta cloud platform
- Businesses in need of a reliable, managed cloud for their departmental applications
- Healthcare organizations and departments subject to HIPAA compliance
- Companies that require PCI Compliance for credit card processing

We'll help you choose a package that's right for you

In addition to the starting package for up to 5 users, there are also options for up to 10 users or up to 20 users, depending upon your need.

With Connectria Citrix Cloud Services, we've created an enterprise-grade solution that's a perfect fit for smaller Citrix environments that need to be up and running quickly. And with our long background in enterprise Citrix deployments, customers have a straight-forward growth path to scale their Citrix environments if needed.

If you have over 20 Citrix users, please see our [Citrix hosting solutions](#) to accommodate large-scale environments for up to 5,000 or more users. For more information [contact us](#).
