100% HIPAA Compliant Hosting on Amazon Web Services

In a complex regulatory environment that requires healthcare providers to keep their Protected Health Information (PHI) secure and reliable, many healthcare organizations have chosen to host their PHI in the cloud using hosting companies that specialize in HIPAA Compliant Hosting. Since becoming the first company to deliver HIPAA Compliant Cloud Hosting in 2007, Connectria has provided 100% secure and reliable HIPAA Compliant Hosting for hundreds of customers.

With the rise in popularity of Amazon Web Services (AWS), companies began to explore how to implement HIPAA Compliant hosting in AWS. While AWS delivers the most comprehensive cloud computing solutions in the world, it does not natively provide HIPAA Compliance. AWS customers are left to architect, implement and manage HIPAA Compliance on their own.

As an audited AWS Managed Service Partner (MSP) with an AWS Healthcare Competency, Connectria provides a turnkey approach to achieving and maintaining HIPAA compliance on AWS. This solution combines Connectria's years of experience providing HIPAA compliant cloud solutions with its expertise in building/managing AWS environments.

Connectria's HIPAA Compliant Managed Services on AWS provides a comprehensive suite of security and support features designed to address HIPAA/HITECH standards, includes set up of an AWS environment to meet HIPAA compliance needs, necessary levels of encryption within AWS and ongoing 24/7 managed services to ensure AWS environments remain HIPAA compliant.

Reduces Time. Reduces Cost. Reduces Risk.

A key benefit of our solution is that it allows customers to reduce their cost to become HIPAA Compliant in AWS, and it significantly reduces the time required as well by avoiding costly delays and mistakes. We understand what AWS components are not supported in a HIPAA environment, which ones are supported, and how to implement them to meet the HIPAA standards. Connectria's staff will also assist you in getting a Business Associate Agreement (BAA) signed with Amazon, and we will enter into a BAA directly with each of our customers as well.

Connectria's security controls and processes go far beyond AWS, and extend throughout our entire company to all of our employees. Each of our staff members are required to take and pass HIPAA Compliance certification, and we undergo an annual HIPAA HITECH Assessment by a qualified 3rd party assessor to ensure that Connectria and our employees continue to meet the HIPAA HITECH standards. Connectria provides access to our HIPAA Compliance Team at no additional cost in order to assist our customers with achieving their HIPAA Compliance objectives.

Many of our customers include Independent Software Vendors (ISVs) who serve the healthcare market and require HIPAA compliance. Some also wish to move their applications to a hosted Software as a Service (SaaS) model. Whether you are a Covered Entity, a Business Associate, or a technology provider to the healthcare market, Connectria can help you implement and manage a HIPAA Compliant environment in AWS.

Connectria's HIPAA Compliant Industry-Leading Features:

- Business Associate Agreement Protections (Connectria and Amazon)
- Vulnerability Scanning For Risk Analysis
- Advanced Data Encryption Support For Data In Motion and At Rest
- Advanced Information Systems Activity Review
- Advanced Risk Management
- Encrypted Offsite Data Backups
- Advanced Device & Media Controls For Media Disposal & Media Re-Use
- Multi-Factor Authentication Support
- Application Access Controls
- Facility Audits
- HIPAA Compliant Employee Controls

An Added Benefit: No Jerks!

Besides being able to run HIPAA Compliant environments with Connectria, at the core of Connectria is our No Jerks Allowed® company philosophy. As 'The Jerk-Free Company,' we've established a unique culture where every individual is courteous and kind, and goes 'the extra mile' to take care of our customers and our employees alike. Being 'The Jerk Free Company' also means we make it easy to do business with us – through flexible terms, scalable solutions and straight-forward pricing – no matter how big or small your hosting needs are.

Being 'Jerk Free' also translates into a real difference for our customers. We're a 5-time Best Places To Work Company, as well as ComputerWorld's Best Places To Work In IT. Our low turnover means the engineers and staff that support our customers today will be here to support them for many years to come. Having to continually retrain your support staff is a chronic problem in the hosting industry–but not with Connectria. Being The Jerk Free Company® extends beyond our people too. We make it easy to do business with us through flexible terms, scalable solutions and straight-forward pricing to serve the hosting needs of large and small organizations alike.

We understand how important technology is to your business; and things like compliance, security, and cloud management are not to be taken lightly. You can feel confident that with Connectria, your organization will meet its HIPAA compliance requirements whether you host your PHI with us, or with Amazon.
