

SOLUTION BRIEF

MANAGED HOSTING

Digital transformation and today's technologies demand an IT team that is as agile as it is strategic. Managed hosting from Connectria helps you respond quickly to the needs of your organization while improving utilization of both your human and IT assets.

Create an agile IT organization

Digital transformation and today's technologies demand an IT team that is as agile as it is strategic. Managed hosting from Connectria helps you respond quickly to the needs of your organization while improving utilization of both your human and IT assets.

Lower CapEx – With managed hosting from Connectria, you don't need to worry about investing in hardware that will quickly become outdated or obsolete.

Improve operating expenses – There's no need to hire additional staff to manage your hosted environment. Our team of support engineers can provide as much or as little expertise and remote-hands assistance as you need.

Customizable – The perfect hosting environment is the one that is engineered to fit your organization and your goals. We can design a solution that's right for you right from the start.

Scalable – As your needs change, our engineers can help you adapt your solution and your approach to keep up with changing market requirements as well as your organizational strategy and objectives.

Compliant and secure – Above all else, we can help ensure that whichever approach you deploy your IT assets remain secure and compliant with the latest industry standards and regulations.

Technology agnostic; customer centric

Our hosting solutions are designed with your needs in mind, not ours. We have in-house expertise across a broad range of technology platforms including Windows, Linux, IBMi, IBM AIX, and Oracle/Sun Solaris, among many others. This technology agnostic approach gives you the freedom to choose the platforms that best suit your needs and the flexibility to leverage the latest advancements. We can also customize a solution around your unique requirements and technology preferences.

"Connectria's responsiveness and customer service have far exceeded our expectations. We don't have to chase them for answers, and it feels good to have a partner like that which we can trust. It drives home the fact that we made the right choice."

Richard Broome
CIO, Host Analytics

Managed Dedicated Hosting

Dedicated means it's yours. You're not sharing your infrastructure with anyone else, giving you the flexibility, performance, and security you need for your mission-critical workloads. Managed dedicated hosting is perfect for large ecommerce websites, core applications such as ERP, workloads containing confidential data such as patient records, and more.

We can host your applications on your servers, or you can lease dedicated hardware in one of our SSAE certified data centers. We'll also manage your systems and network so you can focus on more strategic tasks.

Our dedicated server platforms include:

- Microsoft Windows
- Linux
- IBMi
- IBM AIX
- VMWare
- Microsoft Hyper-V
- Oracle/Sun SPARC (Solaris)

Managed Custom Hosting

No two cloud deployments are the same, and sometimes a packaged hosting solution isn't quite right. We can custom design a solution to meet your unique needs. In fact, this focus on designing solutions to meet our customer's unique requirements has led us to pioneer a number of "firsts" in the industry.

- 1st to deliver Citrix XenApp Cloud Hosting in 2004
- 1st to deliver Private Cloud Hosting in 2005
- 1st to deliver HIPAA Compliant Cloud Hosting in 2007
- 1st to deliver Hybrid Cloud Hosting in 2008
- 1st to deliver fully automated High Availability Public Cloud Hosting in 2008
- 1st to deliver IBMi (iSeries) & IBM AIX Cloud Hosting in 2012

Managed Compliant Hosting

For companies in highly regulated industries, we provide peace of mind with hosting solutions that are designed, built, and managed with your particular regulatory needs in mind. We maintain numerous security compliance certifications including:

- SSAE 18 SOC 1 & 2
- ISO 27001
- PCI-DSS
- HIPAA/HITECH
- FISMA
- FERPA
- And more*

*There are currently no specific tests for GDPR compliance, but we are well-versed on the regulation and are helping many of our clients adapt their systems to ensure compliance.

About Connectria

From Fortune 100 enterprises to medium and small businesses, Connectria provides managed cloud, managed services, and compliant cloud security solutions to more than 1,000 global customers.
